

# Fluke Building Diagnostic Thermal Imagers

Models: TiR32, TiR29 and TiR27. Three models specifically for buildings applications.

## **Technical Data**

Proven Practical Performance The P3 Series: Superior, not Superfluous. Fluke is how other tools are measured.

capturing a visible image with every infrared image allows to you always know exactly what

you're looking at.

The greatest technological advancement in thermography may be how Fluke has made it so simple to capture images and analyze data right out of the box.

### **Superior image quality**

Industry-leading thermal sensitivity and spatial resolution combined with a high definition display, creates the sharpest images in the industry.

### One-handed, easy-to-use interface

With just a push of your thumb, go from one-handed manual smart focus to adding picture-in-picture and even add voice comments.

### **Torture tested**<sup>™</sup>

Before a Fluke goes into your hands, we drop it from ours. Only Fluke thermal imagers are designed from the inside out to withstand a 6.5 ft drop.

### **Patented Fluke IR-Fusion®**

(Picture-in-picture and auto blending) Precision visible and IR image alignment allows Fluke to offer the only on-camera blended infrared and visible image to better diagnose issues.

### **Interchangeable lenses**

Interchangeable wide-angle and IR-Fusion compatible telephoto lenses to cover any application.

Fluke. Not just infrared, infrared you can use.®

### Not all fusion is created equal

Don't be fooled by imitators. No other manufacturer can boast on-camera blending. Compare the images. Only Fluke has mastered the ability to create the industry's only transparent, perfectly blended and aligned visible and infrared images.

Moisture Detection Restoration, water damage and roofing.
