YOUR POWER TESTING SOLUTION

Product

IT-M7700 High Performance Programmable AC Power Supply

IT-M7721L/7722L
Programmable AC Power Supply

APPLICATIONS

- Energy
- Commercial Aerospace
- Industrial Electronics
- Home Appliance
- IEC Conformity Test
- ATS

Your Power Testing Solution

IT-M7721L/7722L Programmable AC Power Supply

ITECH newly-launched IT-M7721L/7722L High Performance Programmable AC Power Supply combines intelligence and flexibility, breaks through the huge defects of the traditional AC power source, reduces the size to only 1U Half-Rack, maximizes space utilization. Built-in power meter and arbitrary waveform generator make it convenient to simulate various arbitrary waveform outputs. IT-M7721L/7722L is designed with advanced technologies of programmable AC and DC power supplies, and can be widely used in multiple fields such as power energy products, home appliances, industrial electronics, avionics, military and IEC standards testing.

Features

- 1U Half-Rack compact design, increased space utilization
- AC, DC, AC + DC output modes, DC voltage offset simulation in AC + DC mode
- Built-in AC power meter with powerful functions
- List mode, simulate civil AC working condition, realize instantaneous power interruption simulation function *1
- Arbitrary waveform output function, user can customize waveforms
- Surge/Trap function
- Front and rear edge Dimmer phase dimming function
- Settable output waveform start/stop phase angle
- Higher voltage available by two units in series connection*2
- Three phase output available by three units Y-type external connections*2
- Optional interfaces include RS232, CAN, LAN, GPIB, USB_TMC,USB_VCP, external analog, IO. Flexible and cost effective
- With professional software, set up programs comply with multinational security regulations and test conditions, to complete military, civil aviation electronics and IEC related standards testing*2

*1 Realize by PC software *2 Coming soon

Model	Power(AC/DC)	Voltage	Current	Frequency	Volume
IT-M7721L	300 VA/300 W	300 V	3 A	45~100 Hz	1U Half-Rack
IT-M7722L	600 VA/600 W	300 V	6 A	45~100 Hz	1U Half-Rack

Your Power Testing Solution

IT-M7721L/7722L Programmable AC Power Supply

1 : 1
picture VS real size

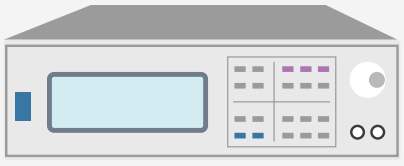
APPLICATIONS

- Testing of commercial and military avionics
- RD, verification and testing of the small-size power supply production
- IEC standard testing
- Communications/Telecommunications
- AC power simulation
- Manufacturing and process control
- Battery or LCD applications
- ATE testing

1U Half-Rack 4.5kg | AC/DC AC+DC | Built-in Power meter | Arbitrary waveforms | Harmonic testing | IEC/Avionics testing

1U Half-Rack Mini size

The conventional AC power supplies are much bigger and heavier, difficult to move. The size of IT-M7721L/7722L is only 1U Half-Rack, but its max. power is up to 600VA. Its weight is 4.5kg only. With such high-power density design, the space is better utilized. So it can be portable, convenient for bench testing and good for system building.



Conventional switching AC power supplies
>10kg

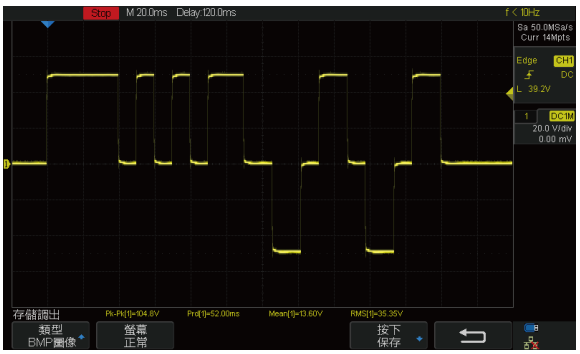
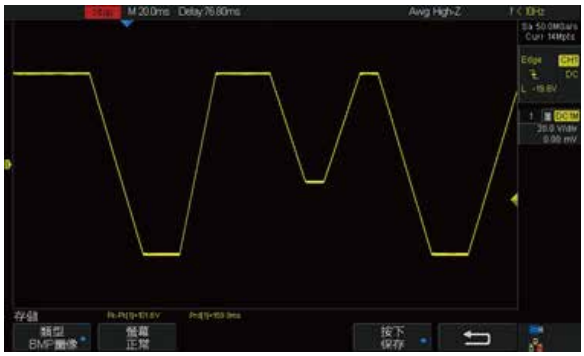
Your Power Testing Solution

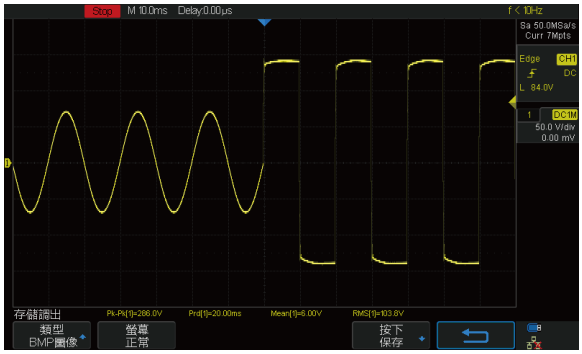
IT-M7721L/7722L Programmable AC Power Supply

Arbitrary waveforms output

Users can self define arbitrary waveforms through IT-M7721L/7722L software and download to power supply so as to simulate or duplicate the real waveforms.

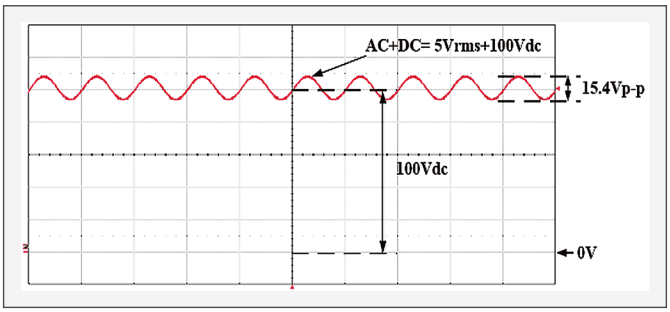


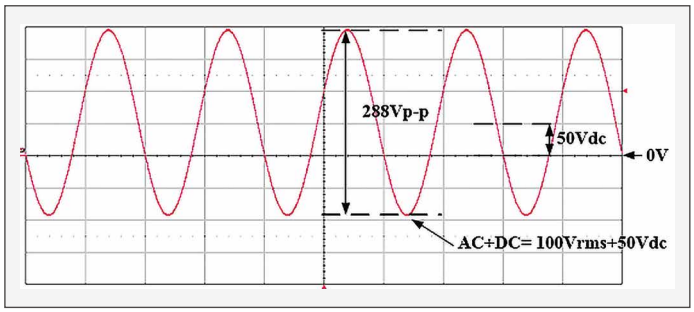




Multiple output modes: AC, DC, AC+DC

The output modes of IT-M7721L/7722L series include AC, DC, AC+DC. It can not only provide pure AC or DC output but also AC+DC output mode which can expand application fields and test DC offset element.

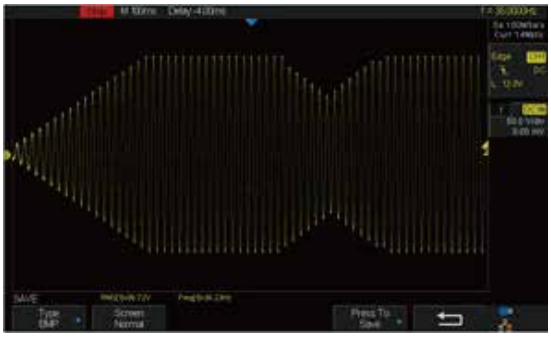


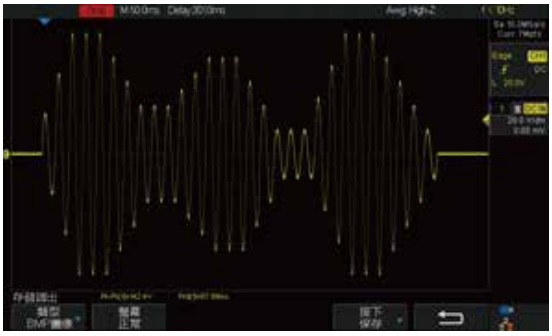


List Mode

IT-M7721L/7722L LIST mode supports program complex waveform editing. The users can edite 5 list files, each file can be edited up to 50 steps. Each step settable parameters include: basic waveform (incl. THD and user defined waveform), AC/DC amplitude, slew rate, frequency,dwell time, start/stop phase angle, times of repetition etc. This function with complex waveforms can help users to simulate grid disturbance, periodic power off and so on.

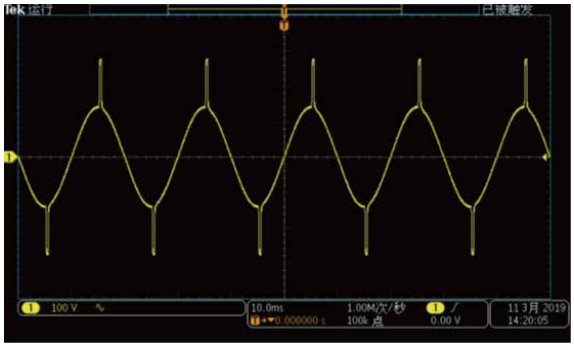
* Available with ITECH PC software.





Surge / Trap Wave Function

IT-M7721L/7722L provide surge and trap wave simulation function. Users can add surge/trap wave to the output sine wave accordingly, to simulate voltage frequent fluctuation. Thus to simulate the real testing environment.



Surge

Trap

Your Power Testing Solution

IT-M7721L/7722L Programmable AC Power Supply

Front and rear Dimmer phase dimming function

The IT-M7721L/7722L supports front and rear phase angle dimming or speed control tests. The user can adjust the active power by setting the phase angle and performing the leading or trailing edge waveform concealment to achieve the purpose of adjusting the light intensity of the lamp. It is used to verify whether there is a quality hazard when the end user uses the dimming or speed controller.

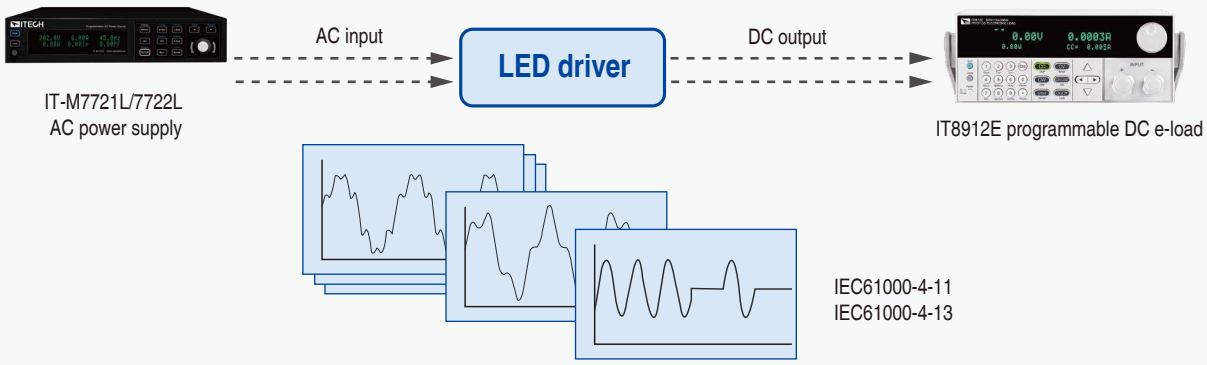
LeadingEdge phase dimming

TrailingEdge phase dimming

Output waveform start/stop phase angle is settable

IT-M7721L/7722L supports the initial phase and stop phase of the output waveform settable to meet different test requirements. The initial phase and stop phase are set in the range of 0-360°. By adjusting the phase angle, the user can test the rush current of the product at different positions which is widely applied to various switch current impulse tests and various rectifiers test.

Application: LED driver, household appliances and other products input surge current and power supply disturbance performance verification



Your Power Testing Solution

IT-M7721L/7722L Programmable AC Power Supply

Built-in AC power meter

IT-M7721L/7722L provides built-in AC power meter which can accurately measure and display 12 parameters on the screen, including rms voltage, rms current , output frequency, active power, power factor, etc. No need for additional power meter. So it can not only reduce test cost but also get rid of the complex connection operation.

Comprehensive protection

IT-M7721L/7722L provides comprehensive protection , including OVP rms, OVP peak, UVP rms, OCP rms, OCP peak, OCP delay, OPP, OTP and smart fan dysfunctional protection.

Application case

When testing a capacitive load with an AC power supply, the voltage will suddenly drop due to high current impulse, which will lead to failure load. At the same time, excessive surge current will easily cause damage to the AC power supply. Therefore, comprehensive protection is essential for the AC power supply. The picture on the right shows the voltage and current curves of the incandescent bulb tested by the IT-M7721L/7722L .

Panel operation and remote control

The users can operate easily on the IT-M7721L/7722L front panel ; They also come with optional USB,GPIB,LAN and RS-232 interfaces, and an analog interface is also available to support remote control and ATE system quick integration. Supporting LXI and SCPI protocol, the user can remotely control the unit via web-server for convenient control and monitoring.

Pictures	Model	Interface
	IT-E1205	GPIB
	IT-E1206	USB/LAN
	IT-E1207	RS–232/CAN
	IT-E1208	Analog
	IT-E1209	USB
	IT-E251	Connection Cable

*IT-E251 is standard accessary for three phase installation and serial connection.

Rear panel with optional interfaces

IT-M7721L/7722L Programmable AC Power Supply

EMC Testing

coming soon

With the professional test software, users can simply recall and complete the corresponding IEC standard test items for EMC test.

IEC 61000-4-11.....GB/T17626.11.....Testing and measurement techniques - Voltage dips, short interruptions and voltage variations immunity tests

IEC 61000-4-13.....GB/T17626.13.....Testing and measurement techniques - Harmonics and interharmonics including mains signalling at a.c. power port, low frequency immunity tests

IEC 61000-4-14.....GB/T17626.14.....Testing and measurement techniques - Voltage fluctuation immunity test for equipment with input current not exceeding 16A per phase

IEC 61000-4-17.....GB/T17626.17.....Testing and measurement techniques - Ripple on d.c. input power port immunity test

IEC 61000-4-28.....GB/T17626.28.....Testing and measurement techniques - Variation of power frequency, immunity test for equipment with input current not exceeding 16A per phase

Compliance Test of Aviation and Ship Electronic Equipment

coming soon

With the strong programming ability, the IT-M7721L/7722L AC power supply can be used to test the immunity of aircraft electrical equipment against AC input changes. With professional software, users can carry out RTCA DO-160D, MIL-STD-704F, ABD0100, Boeing 787B3-0147 and MIL-STD-1399-300B standards test quickly and conveniently. It fully covers the compliance testing of commercial, military aviation, ship and submarine electronic equipment.
